

Your Support in Action

All proceeds from Journey for Hope stay in Missouri to fund programs and services that help improve the quality of life for traumatic brain injury survivors.

The Brain Injury Association of Missouri is a community based organization serving persons with brain injury, their families, caregivers, physicians, therapists, case managers and others throughout the state of Missouri.

Founded in 1982 by a group of parents, the Brain Injury Association of Missouri works through regional chapters and support groups throughout the state.

Services and programs are carried out by hundreds of volunteers who serve as officers, members of the board of directors, speakers, recreation coordinators, fund raisers and office assistants. Many volunteers are survivors of brain injury, family members and health and service providers.

Centers for Independent Living works to empower people with disabilities to become more independent by providing independent living skills training, peer support, information, referral and advocacy.

Proceeds from Journey for Hope will help fund ramps to the houses of wheelchair-bound TBI survivors.

Entry into Journey for Hope is free for all brain injury survivors. A free lunch and shirt also are provided while quantities last. RSVP today.
